PEACEHEALTH SIGNS AGREEMENT TO UPGRADE TO STREAMLINE HEALTH'S ACCESSANYWARE[®] V5.1

Leading Regional Healthcare System to Move to New Service-Oriented, Modular Architecture with Integrated Workflows and Enhanced Features and Functionality

Cincinnati, Ohio – October 4, 2011 — Streamline Health Solutions, Inc. (NasdaqCM: STRM), a leading provider of enterprise and departmental document management solutions and business process workflows for healthcare, announced today that PeaceHealth, a regional healthcare system serving rural, suburban, and urban communities in Alaska, Washington, and Oregon, has signed an agreement through Streamline Health's strategic partner, GE Healthcare, to upgrade to AccessAnyWare v5.1. As part of the agreement the solution will be implemented in PeaceHealth's hospitals and clinics in 2012.

AccessAnyWare v5.1 utilizes modular architecture which leverages components across the framework allowing for increased product development cycles and improved support, as well as simplified deployments. The new architecture will also allow for enhanced performance by allowing other internal systems, including EMR systems, to leverage the open architecture. By utilizing one framework it will also decrease the amount of time and expense clients previously spent training new personnel on multiple systems.

Robert Watson, president and chief executive officer of Streamline Health, commented, "Our product team is focused on developing technologies that give our clients as much flexibility and scalability as possible. Their efforts have resulted in a next generation product that provides enhanced features and functionality, and gives Streamline Health the ability to provide better and faster product development and support to our clients. The new release will provide a solid foundation for our future product development, and we're pleased that PeaceHealth has decided to upgrade to this new version."

Vickie Schraudner, PeaceHealth System Director for HIM, said, "We have been successfully using AccessAnyWare and Streamline Health's workflows for years. We are looking forward to the additional features and capabilities this new release will provide, including the simplified installation and reduced downtimes for upgrades and patches, as well as enhanced built-in efficiency processes. We look forward to continuing our partnership with Streamline Health."

About Streamline Health

Streamline Health transforms unstructured documents, forms, and images into actionable digital assets that improve processes and revenue across the enterprise. Dedicated exclusively to healthcare, our document management solutions create a permanent document-based repository of information that can integrate seamlessly with existing clinical, financial, and administrative information systems. For additional information, please visit our website at <http://www.streamlinehealth.net>.

About PeaceHealth

PeaceHealth is a Washington-based not-for-profit Catholic health care system with medical centers, critical access hospitals, medical groups and laboratories in Alaska, Washington and Oregon with approximately 15,000 caregivers (employees). Founded by the Sisters of St. Joseph of Peace, PeaceHealth has provided health care services to Northwest communities for more than a century. PeaceHealth consistently receives national recognition for innovations in patient-centered care, patient safety and healthcare technology and cost efficiency.
